

Social Security Administration

§ 404.271

(b) *Computing your special minimum primary insurance amount.* (1) First, we subtract 10 from your years of coverage and multiply the remainder (at least 1 and no more than 20) by \$11.50;

(2) Then we increase the amount found in paragraph (b)(1) of this section by any automatic cost-of-living or *ad hoc* increases that have become effective since December 1978 to find your special minimum primary insurance amount. See appendix V for the applicable table, which includes the 9.9 percent cost-of-living increase that became effective June 1979, the 14.3 percent increase that became effective June 1980, and the 11.2 percent increase that became effective June 1981.

Example: Ms. F, who attained age 62 in January 1979, had \$10,000 in total social security earnings before 1951 and her post-1950 earnings are as follows:

Year	Earnings
1951	\$1,100
1952	950
1953	0
1954	1,000
1955	1,100
1956	1,200
1957	0
1958	1,300
1959	0
1960	1,300
1961	0
1962	1,400
1963	1,300
1964	0
1965	500
1966	700
1967	650
1968	900
1969	1,950
1970	2,100
1971	2,000
1972	1,500
1973	2,700
1974	2,100
1975	2,600
1976	3,850
1977	4,150
1978	0

Her primary insurance amount under the average-indexed-monthly-earnings method as of June 1981 is \$240.40 (based on average indexed monthly earnings of \$229). Her guaranteed-alternative primary insurance amount under the average-monthly-wage method as of June 1981 is \$255.80 (based on average monthly wages of \$131).

However, Ms. F has enough earnings before 1951 to allow her 11 years of coverage before 1951 (\$10,000÷\$900=11, plus a remainder, which we drop). She has sufficient earnings in 1951-52, 1954-56, 1958, 1960, 1962-63, 1969-71, 1973, and 1976-77 to have a year of coverage for each of

those years. She thus has 15 years of coverage after 1950 and a total of 26 years of coverage. We subtract 10 from her years of coverage, multiply the remainder (16) by \$11.50 and get \$184.00. We then apply the June 1979, June 1980, and June 1981 automatic cost-of-living increases (9.9 percent, 14.3 percent, and 11.2 percent, respectively) to that amount to find her special minimum primary insurance amount of \$202.30 effective June 1979, \$231.30 effective June 1980, and \$257.30 effective June 1981. (See appendices V and VI.) Since her special minimum primary insurance amount is higher than the primary insurance amounts computed for her under the other methods described in this subpart for which she is eligible, her benefits (and those of her family) are based on the special minimum primary insurance amount.

[47 FR 30734, July 15, 1982, as amended at 48 FR 46143, Oct. 11, 1983]

COST-OF-LIVING INCREASES

§ 404.270 Cost-of-living increases.

Your primary insurance amount may be automatically increased each December so it keeps up with rises in the cost of living. These automatic increases also apply to other benefit amounts, as described in § 404.271.

[47 FR 30734, July 15, 1982, as amended at 51 FR 12603, Apr. 14, 1986]

§ 404.271 When automatic cost-of-living increases apply.

Besides increases in the primary insurance amounts of current beneficiaries, automatic cost-of-living increases also apply to—

(a) The benefits of certain uninsured people age 72 and older (see § 404.380);

(b) The special minimum primary insurance amounts (described in §§ 404.260 through 404.261) of current and future beneficiaries;

(c) The primary insurance amounts of people who after 1978 become eligible for benefits or die before becoming eligible (beginning with December of the year they become eligible or die), although certain limitations are placed on the automatic adjustment of the frozen minimum primary insurance amount (as described in § 404.277); and

(d) The *maximum family benefit amounts* in column V of the benefit table in appendix III.
